DESCRIPTION

Management and Production Review (MPER) is a peer-refe international, multidisciplincovering a broad spectrum c production engineering and Production engineering is a developing stream of science encompassing planning, des implementation and manage production and logistic syste Orientation towards human factor differentiates product engineering from other tech disciplines. The journal aims the theoretical and applied this rapidly evolving field, wi focus on production manage organisation of production p management of production computer integrated manage production flow, enterprise maintainability and sustaina manufacturing, productivity organisation, forecasting, mo simulation, decision making project management, innova management and technolog quality engineering and safe supply chain optimization at Management and Production Review is published under the the Polish Academy of Scien Committee on Production Er Polish Association for Produ Management.

The main purpose of Manage Production Engineering Revi publish the results of cutting research advancing the conc and implementation of nove modern manufacturing. Paper original research results relaproduction engineering and education are also welcome

We welcome original papers English. The Journal also put technical briefs, discussions published papers, book revie editorials.

Letters to the Editor-in-Chief encouraged.
