Comments to the Author(s)

This study focuses on identifying and reducing processing time (PT) waste in the injection molding process and shaft assembling process to increase the amount of production.

Abstract  
 This section should be reviewed entirely by the authors. Please provide a summary of the findings.  
 What did you accomplish with the lean manufacturing method? This was not stated explicitly.  
 The last sentence should be removed.

Introduction  
 a. Authors should modify this section.  
 b. The authors should include a paragraph with some review articles about the injection molding process.  
 c. There should be a linkage with each paragraph in this section.  
 d. The authors should carefully read this section for grammatical errors.

Results and discussion  
 a. This section should be scrutinized because some of the discussions are unclear.

Conclusion  
 a. The authors should go over this section again. More clarification and modification are required.

General comment  
 a. Authors must proofread the entire manuscript for grammatical errors.  
 b. The results and discussion should be rephrased.  
 c. Do the authors consider other factors related to the injection molding machine to reduce or eliminate waste? (Mechanical fault, human errors). These were never addressed throughout the entire study.

Choesnul Jaqin, Hibarkah Kurnia, Humiras Hardi Purba, Tosan Danumaya Molle, Siti Aisyah:

Thank you for sending the manuscript "Lean Concept to Reduce Waste of Process Time in the Plastic Injection Industry in Indonesia: Lean Concept to Reduce Waste" to the Nigerian Journal of Technological Development for publication. I sincerely apologise for the lengthy period of review. The review is now complete. While finding your paper of interest and worthy of publication, the referees and I feel that more work could be done before the paper is published. Our decision is therefore to provisionally accept your paper subject to revisions. Please note that your paper will be rejected immediately if the necessary changes are not made or cannot be easily identified.

I have consolidated the review comments below in the hope that they will be helpful to you in modifying the paper. Please make sure you address ALL the comments and submit along with your revised article, a list or table of changes or rebuttal against each point raised by the reviewers and editor. Also please highlight any revised text using coloured highlighting in a separate word document. This will enable the Editor/Reviewers to identify the amendments and subsequently make faster decisions on the revisions.

If the modification is done carefully and completely, upon re-submission and evaluation, I think you can be confident that the paper will be accepted for publication in NJTD. Thank you again for sending this paper to NJTD for consideration.

Please note that, in order to publish your paper as soon as possible, we give you **15 days** from this date to return your revised version via your portal. In case you require more days to do the revisions, please do not hesitate to request from the Editor.

I look forward to receiving your revised version.

Dear Editor,

Today I am trying to transfer but there are problems because Africa is a high-risk country for payment transfers. So please send us an INVOICE LETTER from NJTD or Your University, which must include:

Account Name: Nigerian Journal of Technological Development [NJTD]  
Bank Name: United Bank for Africa Plc  
Kindly Please enter the bank address (completed).  
Account Number: 2245963694  
SWIFT Code: UNAFNLA049  
Country: Nigeria  
And please enter your NJTD address and Telephone number.

At this time we need the invoice as proof of a request from APC payments and our bank is requesting that requirement.

Thank you and looking forward to your reply

Note:  
Bank indonesia will have a long holiday from April 19 to April 26 2023 (Eid Mubarak day)

Best regards  
Hibarkah
